EDUCATION

B.Tech (CSE) R.D Engineering College <i>A. P. J. Abdul Kalam Technical University</i>	2022-2026
Intermediate TRM Public School <i>CBSE</i>	2021-2022

OVERVIEW

A passionate and dedicated Computer Science Engineering student with hands-on experience in full-stack web development. Skilled in building real-time, scalable web applications using modern technologies such as Node.js, Express, MongoDB, and Socket.IO. Eager to solve real-world problems through clean code, efficient logic. Always looking to learn, grow, and contribute to impactful projects.

EXPERIENCE

CARRERNEST – Backend Developer Intern

- Developed real-time chat functionality using Socket.IO ,
- Implemented authentication system and friend connection requests

SKILLS

- Node.js
- My Sql
- Html
- React-js
- Git
- Express
- Css
- MongoDb
- Web Sockets
- Redis
- Docker

Certificates

- 1) Python | [Link](#)
- 2) Javascript | [Link](#)

PROJECTS

- **Shortify** | [Live Link](#)

Shorten URLs and earn money effortlessly. Create a free account to access monetized short links with higher payouts. Guests get 15-digit links valid for 5 days, while members enjoy 10-digit links with 14-day validity and extra earning features!

- **Quick Write** | [Live Link](#)

QuickWrite is a real-time collaborative text editor powered by Socket.IO, Node.js, and Express. Instantly sync text across users without login—perfect for quick notes and sharing. Hosted on Render, it delivers a fast, minimalist, and reliable writing experience through efficient WebSocket communication.

- **RTCA** | [Live Link](#)

A secure, real-time one-on-one chat app built with Node.js, Express, MongoDB, and Socket.IO. Features OTP-based user verification via Nodemailer and token-protected routes for safe access. Enjoy smooth, live messaging with reliable data storage and chat history powered by MongoDB.
